## ACADEMIC PROJECT DETAIL:

**Project Title :** " Design & Implementation of Cyclic Codes Encoder & Decoder using FPGA "

**Guidance :** Dr. Arijit Saha ( Professor of BPPIMT ECE dept.)

**Duration :** Near Three Months

**Objective :** In this project, a (15, 10) cyclic encoder and decoder has been implemented in VHDL which can be downloaded onto an FPGA. The encoder hardware is less complex than the decoder. Both circuits use a division circuit to compute the remainder of a polynomial division over finite fields. The implemented encoder and decoder were simulated. The results obtained show that both the circuits function as expected.

**Project Title :** " Working Process & Techniques of a Retail Branch of HDFC Bank "

**Guidance :** Mr. Sumit Kumar Bansal ( Branch Manager, HDFC Bank)

**Duration :** Near Three Months

**Objective :** The purpose is to get a cross sectional view the practices followed in the different works, strategies in a retail branch of a bank and performances across different retail branch banking business initiative. To understand the different models and strategies adopted by the banks across retail banking business line and also derive the inferences for the future. The study is intended to present a holistic picture of a retail branch.
