- Playing Games

Career Objectives

Work for an organization which provides me the opportunity to improve my skills and knowledge to growth along with the organization objectives. as well as to enhance my knowledge about new and emerging trends in the IT sector.

Projects

HP Medicine Store using PHP and MySQL

- The project was developed in the PHP scripting Language and uses MySQL as the database with the aim to automate the entire functions of a medicine store.
- All the records including buy , sells customers and invoices are stored in the database.
- This application requires the registration for this site who have full access to the entire system.
- Admins can further add new customers, add new medicines, delete expired medicine and generate a sales invoices.
- The main purpose of this project is that customer can order their medicine according to their requirement whatever their needs.
