Projects

- **Research Work (2019)**

Dissertation work has been done on Seed Priming and Foliar Application response of salicylic acid on physiological and morphological parameters of rice under drought conditions. This research work is a part of my post graduation.

- **The Rural Agricultural Work Experience Programme (2017)**

Undergone one month of "Rural Agricultural Work Experience" at Hamirpur (HP) Fields. The project was to develop understanding of rural community life and different situations prevailing in villages with special reference to agriculture. The details of the activities under this project were collection of the crop data related to rainfall, temperature, relative humidity and other available weather data and analyzed the data. Suggested the crop based on the length of the growing period of local farmers.

Education

B.sc (Hons) Agriculture, Lovely Professional University, Jalandhar
August 2014 - July 2018

- CGPA : 7.44/10

M.sc Agronomy, Lovely Professional University, Jalandhar
August 2018 - December 2020

- CGPA: 7.46/10
