## **PROJECTS**

---

### **Data Analytics Project – Future Rank Prediction of UPSC CIVIL SERVICES EXAMINATION using multiple linear Regressions. (JULY 2021)**

- Analyzed data of around 2700 students from past three years which was in raw form by transforming data into excel format.
- Used multiple linear regressions in R-programming to find the intercept and slopes which are used in predicting the future rank of students.
- Used MS Excel for making prediction of 50 random students.

### **Data Analytics Project – Selection of Indian Cricket Team for upcoming world cup using Exploratory Data Analysis (EDA) and Descriptive Model. (MARCH 2022)**

- Analyzed data which contained more than 2 lakh data points in excel format.
  - Analyzed IPL ball by ball data from year 2008 to year 2021.
  - Used python libraries like NumPy, Pandas, Matplotlib, Math, SciPy, and Tabulate for analyzing our data to reach the desired results.
  - With the help of data visualization and coding in python we are able to get our top 11 players which can be a part of upcoming T20 squad for world cup.
- 

## **APTITUDE SKILLS**
