Project – PLANTS TRANSPLANT MACHINE

Lyallpur khalsa College of Engineering, Jalandhar

June 2019

- ✦ Made a unique project namely PLANTS TRANSPLANT MACHINE in last year at campus which took around 5 months to complete. There was merely four members are involved in this project work.
- ✦ In this project my work was to do work on balancing of machine and designing.

- ✦ This machine is merely made for reducing the effort which are putting by farmers in each and every year on their farm. Moreover, it will decrease the cost as well as time as it will able to transplant the seeds with proper efficiency which help the farmer a lot.

INTERNSHIPS

Kalsi Metal Works Private Limited, Jalandhar

January 2020- march 2020

- ✦ Undergone 3 month of industrial training in fitting shop department and observed how they manufacture and assemble motors and how they managing their time to complete their work in sequence with efficiency and accuracy. I learnt a lot over there about how industries works every day. After that I did work at machine shop a little bit likely making production report and time study along with inspection report.
